

TRANSLATIONAL RESEARCH & DEVELOPMENT LAB (TRDL)

MISSION: To translate important scientific innovations into products and services for patients suffering from blood diseases or in need of safe, effective blood transfusions.

VISION: Establish partnerships to create the future of transfusion medicine and advance novel therapies for hematology patients.

NETWORK: The TRDL is an expert team led by Bruce Sachais, MD, PhD, who also serves as the Chief Medical Officer for New York Blood Center Enterprises (NYBCe) and Medical Director of Blood Bank of Delmarva (BBD). The lab is coupled with a broad NYBCe network and clinical lab expertise.

BROAD CAPABILITIES & OPERATIONS:

- Blood component preparation
- WB component analysis
- Immunohematology
- Plasma and whole blood coagulation
- Provide research supply of blood products
- Hematology
- Consulting services
- Bacterial Sterility Testing
- Various biological analyses

LOCATIONS: New York, NY and Newark, DE
