

# Manufacturing GTP and GMP

Platform-agnostic support  
for preclinical through  
commercial products

## Where Your Patients Are

Embedded in thriving biomedical ecosystems and with a large network of collection sites with proven logistics, our manufacturing facilities connect donors, developers, and patients for improved access to advanced therapies.

- +** **One-Stop Shop:** Complete Draw-to-Thaw® service creates efficiency, lowers costs, and shortens time to patient treatment
- +** **Capacity:** Phase I-II clinical trials through commercial manufacturing occurs with seamless tech transfer across sites in NY and KY
- +** **Technology:** From closed systems and modular components to ISO 7 clean rooms, our facilities are outfitted with state-of-the-art instrumentation
- +** **Connection:** Proximity and relationships with leading medical centers, academic cores and partners like NMDP facilitate clinical trial recruitment
- +** **People:** Dedicated staff who are experienced with an array of cell types and manufacturing protocols work as an extension of your own trusted team
- +** **Flexibility:** Adaptable to meet any development or manufacturing needs along with phase appropriate regulatory approach
