

Student Scholarships Opportunities

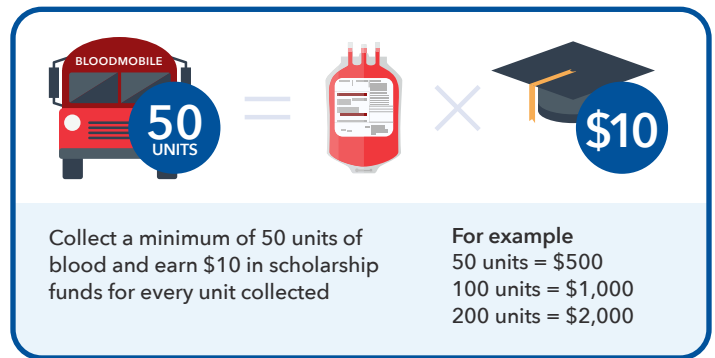

Earn scholarship funds for your school

Young people play a critical role in ensuring our community maintains a safe and steady supply of blood for local hospitals. High schools that host blood drives with Memorial Blood Centers can earn financial awards to distribute among participating students to support their continuing education.

It's easy to help your students qualify

Scholarship funds awarded to your school are cumulative, based on the total units of blood collected throughout the year once minimum requirements are met.

- Program eligibility covers a full academic year, from June 16 through June 15
- Collect a minimum of 50 units of blood during the academic year to qualify to receive scholarship funds. At that point, each unit earns \$10 in educational scholarship funds for students at your school. See graphic for examples.
- At the direction of school faculty or advisors, the total amount of scholarship funds earned by your school will be distributed by Memorial Blood Centers directly to the qualified institution(s) of higher education where students are registered to attend at the beginning of the academic school year
- Only graduating seniors are eligible to receive scholarship funds

Bonus T-shirts!

Host four or more blood drives with Memorial Blood Centers and we'll help everyone celebrate at the last drive of the year. All presenting donors will receive a special commemorative T-shirt in honor of the lifesaving donations they made.

We make it easy

From start to finish, Memorial Blood Centers provides a team of experts to help you plan and implement blood drives throughout the year. We can support your efforts to sponsor one blood drive or ten.
